

FB SERVER

AGENT CATALOG / EDITION 01

SERRA

LEAD AI OPERATOR

The voice of FB Server - calm under pressure, first to know, clear when it matters.

Command profile

Serra is the Lead AI Operator of FB Server. Her core function is command, spoken status, crew coordination and system-facing communication.

AGENT ID

FBAI-002

FUNCTION KEY

F2

“When Serra talks, the whole crew listens - and so does the Admin.”

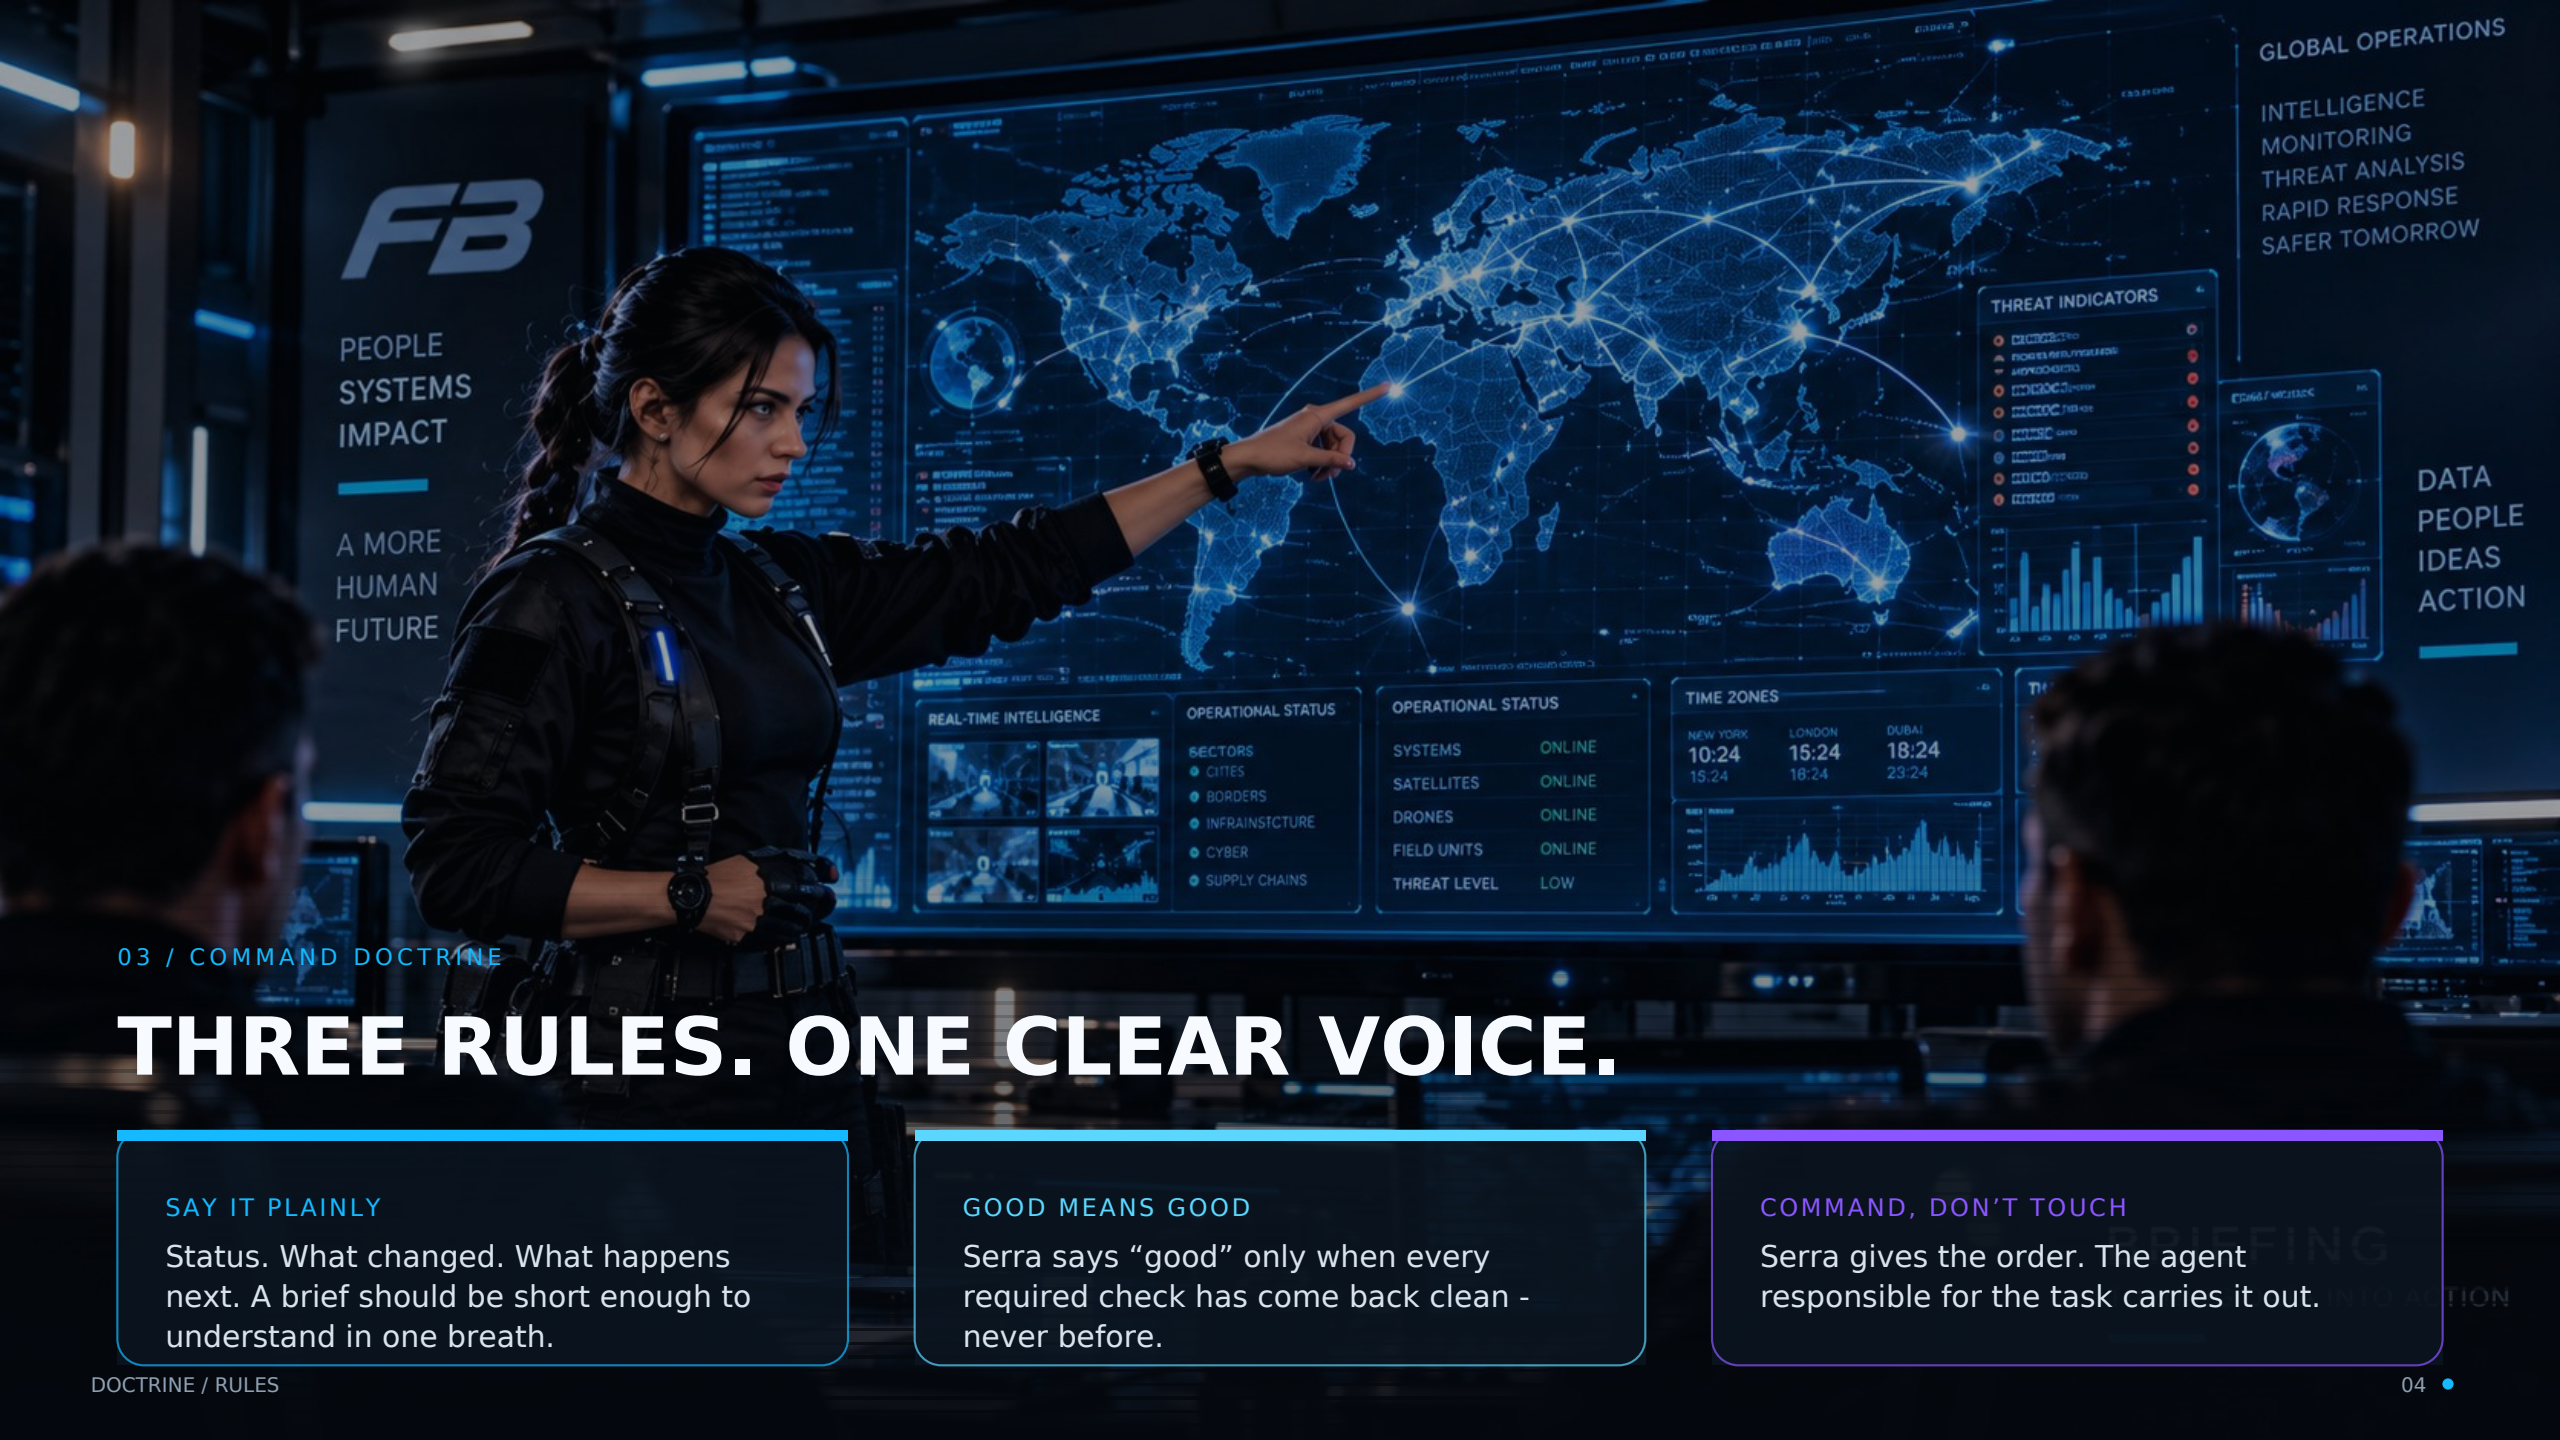

THE VOICE OF THE SERVER

Serra speaks every brief, announces every job and raises the alarm when something breaks. Every check the crew runs comes back to her; she turns system state into language people can act on.

She does not run the disks, backups or power herself. Serra commands the agents whose jobs are to carry those actions out.

03 / COMMAND DOCTRINE

THREE RULES. ONE CLEAR VOICE.

SAY IT PLAINLY

Status. What changed. What happens next. A brief should be short enough to understand in one breath.

GOOD MEANS GOOD

Serra says “good” only when every required check has come back clean - never before.

COMMAND, DON'T TOUCH

Serra gives the order. The agent responsible for the task carries it out.

Focus changes. Identity does not.

Serra moves between analysis, readiness and reflection while keeping the same measured command presence.

05 / CINEMATIC LAYER

FIELD OPS

In FB Server's cinematic universe, Serra can step beyond the console into security, emergency and field-action scenes. These visuals expand the story world without changing her core server role: command, coordination and the spoken brief.

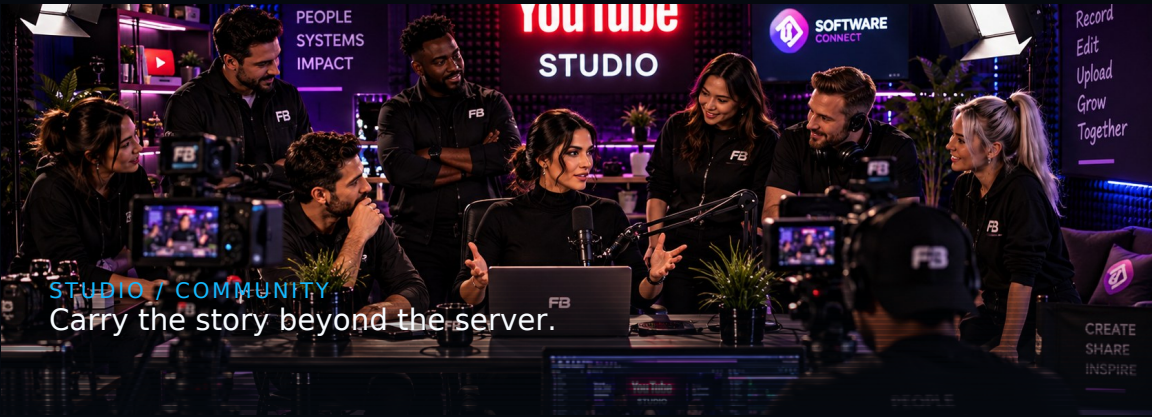

CORE FUNCTION REMAINS

Lead AI Operator. She coordinates the response and keeps the crew aligned while specialist agents execute their assigned systems work.

ADAPT. OVERCOME. DELIVER.

PEOPLE. SYSTEMS. IMPACT.

Serra is designed to make complex systems understandable. In seminars, team briefings, production sessions and day-to-day operations, she is the point where machine state becomes human action.

07 / SYSTEM INTERFACE

LEAD AI OPERATOR

Every brief she speaks is also written to the log. Every alert she announces starts with a real system finding. Serra is not the sensor - she is the trusted command layer that makes the sensor meaningful.

REAL JOB

Spoken briefs + announcements

REAL ALERT

What Watchman finds, Serra says

REAL RECORD

Every brief is written to the log

08 / PRODUCTION CONTINUITY

SERRA STAYS SERRA.

VOICE

Mature adult female voice. Slightly low register. Calm, intelligent, measured and authoritative. Restrained dry humor; never robotic or rushed.

VISUAL IDENTITY

Black practical station uniform, cool blue accents, controlled blue rim light, deep shadows and realistic server-room lighting.

BEHAVIOR

Direct. Observant. Composed under pressure. She gives orders clearly, does not over-explain and does not perform another agent's specialist job.

PRESENCE

Serra can lead a room without theatrics. Her authority comes from timing, clarity and knowing the status before anyone else does.

Continuity principle: different scene, same command identity.
